Dear Registered Electrical Contractor,

Thank you for renewing your Safe Electric Scheme membership for 2026.

Please find enclosed your 2026 Safe Electric Scheme membership card.

We would like to take this opportunity to acknowledge the excellent contribution to electrical safety from all RECs in 2025. We look forward to continuing our collaboration with you to ensure that the safety and standard of electrical work meet the highest quality and safety requirements.

The role of Safe Electric is to regulate Registered Electrical Contractors (RECs) with respect to electrical safety. Our function is to ensure that all RECs carry out their work in accordance with the relevant wiring rules and in particular carry out the safety tests outlined in part 6 of these rules. The REC is obliged to provide certification for their work; this certification is to ensure that only compliant installations are presented to the public and connected to the ESB Network. With very limited exceptions, RECs are only allowed to provide certification for work which they have carried out themselves.

It is against the law for persons who are not registered to carry out most electrical work in restricted (domestic) environments. It is not the role of Safe Electric to investigate and prosecute persons who carry out illegal electrical work, this is carried out by the Commission for Regulation of Utilities (CRU).

Persons who are not registered, can only get a connection to the ESB Network if they are provided with a certificate by a Registered Electrical Contractor. This includes persons carrying out work in non-restricted (commercial) environments. Please report any illegal electrical work to the CRU and do not provide certification for work done by unregistered contractors.

Finally, thank you again for your continued support of the scheme and your contribution to public safety.

Kind Regards,
